Subject: Urgent Action Required Regarding Smart Meters in [Insert State Name]

Dear [Energy Company Representative],

As a resident of [Insert State Name], I am expressing my grave concerns about the smart meters installed by [Energy Company Name], particularly due to the health risks they pose. My own health has deteriorated, and I strongly believe it's linked to the smart meter's radiation.

To underscore my concerns, I reference two specific legal cases:

- 1) **Mass Tort against Edison and PG&E:** A lawsuit filed by attorneys David Kyle and Paul Overett representing multiple plaintiffs who suffered various health issues, from headaches to heart problems, due to smart meter radiation. The utilities were accused of negligence, fraud, and deceit (More details can be found in the following source: <https://thepeoplesinitiative.org/lawsuits/mass-tort-filed-against-utilities-for-health-effects-from-smart-meters-smart-grid/>)
- 2) **Lawsuit by Celeste Deborah Cooney:** Cooney filed a lawsuit in a California federal court against SDG&E and Itron, among others, for severe health problems caused by smart meter radiation. This case highlights the serious infringement of personal health and safety due to smart meter radiation (More information available here: <https://www.eastcountymagazine.org/san-diegan-files-suit-over-smart-meter-health-issues>)

Given these alarming precedents, I urge [Energy Company Name] to take the following actions:

**Free Health and Safety Inspections:** Conduct an immediate inspection of installed smart meters to ensure they are safe and do not pose health risks.

**Opt-Out Option Without Penalty:** Provide an option for residents to remove smart meters without incurring additional costs.

**Health Evaluations at Company Expense:** Arrange and cover the costs for medical evaluations for residents like myself, who believe our health has been negatively affected by smart meters.

**Informed Consent for Future Changes:** Ensure residents are fully informed and explicitly consent to any future installations of similar devices.

The health and safety of your customers must be a priority. I expect [Energy Company Name] to address these issues with the urgency and seriousness they deserve.

Thank you for your prompt attention to this matter.

Sincerely,

[Your Name]
